

TennCare Preferred Drug List (PDL)

Effective September 1, 2024

PA – Prior Authorization required, subject to specific PA criteria; QL – Quantity Limit (PA & NP agents require PA before dispensing); B – Budgetary Reduction edit for utilization control (Standard NP PA criteria does not apply); ID – Class PA for patients with Intellectual or Developmental Disability; Abbreviations: caps = capsules; conc = concentrate, soln = solution; susp = suspension; tabs = tablets

Please note the following:

- **All agents must be prescribed by a provider with a Tennessee Medicaid Provider ID**
- **Approval of NP agents requires trial and failure, contraindication, or intolerance of 2 preferred agents, unless otherwise indicated**
- **Agents not listed on PDL may be considered non-preferred**
- With the exception of the “Branded Drugs Classified as Generics” list, TennCare is a mandatory generic program in accordance with state law (TCA 53-10-205). Approval of a branded product when a generic is available **requires** documentation of a serious adverse reaction from the generic via an FDA MedWatch form **OR** contraindication to an inactive ingredient in the AB-rated generic equivalent. Therapeutic Failure of an AB-rated generic equivalent may be considered for approval of branded products in the following high-risk medication classes: Anticonvulsants, Atypical Antipsychotics, HIV antivirals, Immunosuppressants, and Oncology Agents.
- Unless otherwise noted, all agents listed on the PDL are referencing legend drugs which are prescription-required agents. Coverage of Over-the Counter (OTC) Products is listed at: [Covered OTC List](#)
