

Optum Rx[®] Vigilant Drug Program

Non-essential drug strategy

Effective July 1, 2026

The Vigilant Drug Program helps you manage your pharmacy benefits with greater precision by giving you the flexibility to choose whether to limit access to certain categories of drugs, including new ones whose clinical and financial value are not yet fully established.

This approach takes medication quality and affordability to the next level.

Non-essential drug strategy* – Excludes select products that are available in the market but may not be approved by the U.S. Food and Drug Administration (FDA) or are deemed non-essential by the Optum Rx Pharmacy & Therapeutics (P&T) Committee. These high-dollar products offer little clinical value versus other well-tested, FDA-approved agents.

In this document, brand-name medications are shown in UPPERCASE (for example, CLOBEX). Generic medications are shown in lowercase (for example, clobetasol).

*Programs are also available for clients who prefer prior authorization rather than an exclusion strategy.
