

Mental Health Medications and Utilization Edits

Effective July 1, 2025
(Version 1.0)

Mental Health Medications

Drugs that are:

- classified in a central nervous system drug category or classification (according to Drug Facts and Comparisons) created after March 12, 2002 and
- prescribed for the treatment of a mental illness (as defined by the most recent publication of the American Psychiatric Association's Diagnostic and Statistical Manual of Mental Disorders)

Therapeutic categories ("AAAX List"):

- Antianxiety agents
- Antidepressants
- Antipsychotics
- "Cross indicated"
- Other CNS agents prescribed for the treatment of mental illness

Utilization Edits

Pharmacy claims processing edits, some of which require a medical necessity review through the PA process, address prescribing situations that are inconsistent with established pharmacokinetic principles and clinical practice guidelines. Utilization edits include, but are not limited to:

- drug interactions
- frequency of refills
- dose optimization
- age
- days' supply
- compounded drug claims
- quantities dispensed
