Vaccine Coverage Guide

for Non-Medicare PPO Members

Understanding your health plan coverage just got easier.

Be informed.

Staying up to date on your immunizations can reduce your risk of contracting serious illnesses.

Your retirement system health plan covers many vaccines at no additional cost to keep you healthy. The vaccines listed below are covered by your medical plan, administered by Blue Cross Blue Shield of Michigan and by your prescription drug plan, administered by Optum Rx for non-Medicare PPO members.

Review the chart in this guide to help you understand your retirement system vaccine coverage.

You pay $0 for vaccines covered by your retirement system health plan.

Vaccine category	Vaccine brand name

Typhoid	Typhim, Vivotif		
Varicella (Chickenpox)	Proquad*, Varivax, Varizig		
Yellow Fever	Stamaril, YF-Vax		

*Combination product that contains other vaccines.

Keep in mind that the medical and prescription drug plans are administered separately. This means Blue Cross and Optum Rx can only answer questions about the coverage they provide and cannot answer questions about the other plans.

When you become eligible for Medicare, Blue Cross and Optum Rx will remain your trusted partners as you transition to your Medicare Advantage plan. We've created a *Vaccine Guide for Medicare PPO members* to help you navigate the Medicare plan vaccine coverage. You'll need to review the guide prior to enrolling in Medicare.

WHERE CAN I GET VACCINATED?

You can get the vaccines in the chart at the following locations:

- Participating, local or network pharmacies.
  - To locate a Blue Cross participating pharmacy, go to **bcbsm.com/mpsers**, click *Medical Plans* and select *Blue Preferred PPO*. Then, follow the instructions provided next to the *Michigan immunizing pharmacies* section. Present your Blue Cross ID card to receive coverage at these locations.
  - To locate an in-network Optum Rx pharmacy, log in to your online member account at **optumrx.com** or call the number on your Optum Rx ID card. Present your Optum Rx ID card to receive coverage at these locations.
- Doctor's office. Your doctor can administer the vaccine or you can ask them to send an electronic prescription to your network pharmacy.
- Retail health clinic or Health Department.

SHOULD I USE MY BLUE CROSS AND OPTUM RX MEMBER ID CARDS?

Yes. Because vaccines are covered by both Blue Cross and Optum Rx, you should present both member ID cards before getting vaccinated. Presenting both member ID cards upfront ensures your healthcare provider can bill the correct carrier for each vaccine, which helps you avoid out-of-pocket costs and reimbursement hassles later.

HOW TO GET REIMBURSED.

If you receive a covered vaccine and have to pay the out-of-pocket cost upfront, you can submit a reimbursement request to have the costs paid by your insurance. You can request reimbursement from either the medical plan or the prescription drug plan.

- For medical plan reimbursement requests, you will need to complete the *Member Reimbursement Form* from your online Blue Cross member account at **bcbsm.com/mpsers** or on the Blue Cross mobile app.
- For prescription drug plan reimbursement requests, you will need to complete the online reimbursement claim form at **dmr.optumrx.com**. Costs for a visit to the doctor's office are not reimbursable.
