

2024 Preventive medications and your plan

Effective Jan. 1, 2024

Managing your health with preventive medications

Your pharmacy benefit plan includes special coverage for preventive medications.

The drugs on your plan's preventive medications list do not have a deductible. This means you'll pay your copayment/coinsurance or nothing at all, depending on your plan.

To check the cost of any medication, call the number on your Optum Rx member ID card, visit your plan's website on your member ID card, or log on to the Optum Rx app.

Potential savings with generic medications

To get the most from your benefits, ask your doctor if a generic medication is right for you. Generics normally cost less than brand medications, and the Food and Drug Administration (FDA) requires them to be just as safe and effective. Using generics may be required based on your plan benefit.

A list of covered preventive medications begins on the next page.

Medications are listed by therapeutic category. Where differences are noted between this list and your benefit plan documents, the benefit plan documents will rule.

For questions on injectable preventive medications administered by your doctor or healthcare provider, please call the number on your Optum Rx member ID card. This list should be used as a reference and may not include all medications.

Refer to benefit plan documents to make sure listed medication is included in your benefit. This list should be used as a reference and may not include all medications. Brand or generic availability may not be current because of market changes. Using generics may be required based on your plan benefit.

Quality drives our decisions

This list is maintained using expert opinions from the Optum Rx Clinical Services and Regulatory Affairs departments and by independent insights and reviews from the Pharmacy & Therapeutics Committee, external clinical consultants, and other clinical resources.

Your health is important. Taking preventive medications as prescribed by your doctor or healthcare provider can help you avoid serious illness and high healthcare costs.
