Will the medication I'm currently taking be covered with OptumRx?

To learn if your medication is covered, check your plan's formulary (list of covered medications) online on or after your effective date. You can also find out if you need to do anything before filling your next prescription.

What information does the formulary include?

The formulary is a list of commonly prescribed medications. It also:

- Identifies medications for certain conditions and organizes them into cost levels called tiers
- Lets you know if any medications require prior authorization or step therapy, which may affect how they are covered and how much they will cost
- Includes information about medications that may have quantity/supply limits or are considered a specialty medication

To learn if your medication is covered after your plan moves to OptumRx, check your formulary with the app or online. You can also find out if you need to do anything before filling your prescriptions.

Why could my medication cost or coverage change?

Your cost or coverage could change for several reasons including:

- Medications could move to a different tier
- Medications may no longer be covered
- You may be required to get a prior authorization (pre-approval for benefit coverage)
- You may be required to try other medications first (step therapy)
- Medications may only be covered in certain quantities or in a specified time period

Will I be notified if my medication coverage changes?

You may receive a letter if your coverage is changing or if your prescription will cost more.
