Informational section

Understanding your PDL

What if I have questions about my prescription drug benefit?

You can contact Member Services at:

- Toll free at **1-888-563-2250**, local at **1-916-563-2250** or for the hearing-impaired call TTY **711**

These phone numbers are also listed on your Western Health Advantage (WHA) ID card. Member Services can help you with these and other questions:

- Submitting prior authorization and step therapy exception requests
- Providing your cost share amount under your pharmacy benefit for drugs subject to a copayment or coinsurance
- Answering questions about medications that may be a part of your medical benefit, or you can also contact your doctor for more information.

What is a PDL?

A PDL is a list of prescribed medications or other pharmacy care products, services or supplies chosen by your plan for their safety, cost, and effectiveness. Medications are listed by categories or classes and are placed into cost levels known as tiers. It includes both brand and generic prescription medications approved by the U.S. Food and Drug Administration (FDA). The drug list in this PDL is organized by the American Hospital Formulary Service (AHFS) Pharmacologic-Therapeutic Classification system.

Optum Rx® is guided by their Pharmacy and Therapeutics Committee. This group of doctors and pharmacists reviews which medications will be covered, how well the drugs work, and overall value. They also make sure there are safe and covered options.

How do I use my PDL?

You and your doctor can use the PDL to help you choose the most cost-effective prescription medications. This PDL booklet tells you if a medication is generic or brand, and if special rules apply. Bring this PDL with you when you see your doctor or use the website link located on the cover page. If your medication is not listed here, please visit your plan's website or call the number on your member ID card.

You can find out if your medication is listed in the PDL and if it is covered by the plan by using the alphabetical index by its brand or generic name, or by using the Category list.

The index at the end of the PDL lists the names of drugs by both generic and brand name, in alphabetical order. Once you find the drug name, go to the page number listed to locate the coverage information.

About this PDL

Where differences exist between this PDL and your benefit plan, the benefit plan documents rule.

This is not a complete list of your covered medications. Please review your benefit plan documents for full details. The presence of a prescription medication on the PDL does not guarantee an enrollee will be prescribed that drug by a provider for a particular medical condition. Not all formulary alternatives listed in this document may be appropriate for your specific condition. Please talk to your doctor.

Category List: Drugs are grouped into AHFS therapeutic categories, which are listed under the Table of Contents in the PDL. If you know what category your medication is in, refer to the Table of Contents to find the page.

If a generic equivalent for a brand name is not available on the market, the generic drug will not be listed separately. The presence of a drug on the PDL does not guarantee that your doctor will prescribe the drug for a particular medical condition.

What are tiers?

Tiers are the different cost levels you pay for a medication. Each tier is assigned a cost, set by your employer or plan sponsor. This is how much you will pay when you fill a prescription.

What are preventive drugs?

Preventive health drugs are select drugs required by law to be covered at no charge to members in select plans. Preventive health drugs are determined based upon evidence-based recommendations by the United States Preventive Services Task Force (USPSTF) with a rating of “A” or “B”. Please refer to your 2025 FEHB BENEFITS BROCHURE (#RI 73-936) for more information on coverage.

When does the PDL change?

- WHA will update the printed PDL formulary with changes monthly. All previous versions are no longer in effect.
- Medications may move to a lower tier at any time.
- Medications may move to a higher tier when a generic equal becomes available.

On January 1 and July 1 of each year:

- Medications may move to a higher tier or be excluded from coverage. You may have to pay a different amount for that medication.
- We may add prior authorization, quantity limits and/or step therapy requirements.

Please note: We will notify you 60 days before a negative change becomes effective if you currently take the medication or at the time you request a refill (you will receive a 30-day supply). This notice will include (A) change in drug or dosage form; (B) changes in tier placement of a drug that results in an increase in cost sharing; and (C) any changes of utilization management restrictions, including any additions of these restrictions.

What drugs are covered under the medical prescription drug benefit?

Office Administered drugs are products that require administration or observation by medical personnel. These drugs and products are covered under your medical benefit when prescribed by a participating network provider and they are administered to you at a participating facility.

Why are some medications excluded from coverage?

Drugs not listed on the formulary are called non-formulary or excluded drugs. A medication may be excluded from coverage under your pharmacy benefit when it works the same as or is similar to another prescription or over-the-counter (OTC) medication.

To request a non-formulary coverage exception, please call the customer service number on your WHA ID card or have your doctor submit an exception request to WHA. Once we receive all the needed supporting information, we will approve or deny the exception request based on medical necessity within 72 hours for non-urgent requests, or within 24 hours in urgent or exigent circumstances. If an approval or denial is not sent within these timeframes, then the request will be considered approved. If a request is approved, it will continue to be covered for the length of the prescription, including refills. If WHA denies an exception request, the member, an authorized representative, or the provider can file an appeal/grievance with WHA, as described in the 2025 FEHB BENEFITS BROCHURE (#RI 73-936).

What if I don't agree with a decision about an excluded medication?

You, your authorized representative, or your doctor can ask for a coverage exception request by calling the number on your member ID card. WHA member services representatives can help guide you further.

What if a drug that I am already taking is excluded or limited from coverage?

If WHA moves to exclude a drug that was previously covered and provided to a member, WHA will not limit or exclude coverage and will continue to provide the drug as long as it was previously approved by WHA and continues to be prescribed by the prescribing provider, and the drug is appropriately prescribed and is safe and effective for the member's medical condition, as required by law.

What is the copay amount for oral anti-cancer drugs?

Oral anti-cancer drugs are subject to a maximum cost sharing of \$250 for each 30-day supply.

Medication tips

What is the difference between brand-name and generic medications?

Generic medications contain the same active ingredients (offer the same effect) as brand-name medications, but they often cost less. In some situations, brand-name medications could be lower in cost.

What if my doctor writes a brand-name prescription?

If your doctor gives you a prescription for a brand-name medication, ask if a generic or lower-cost option could be right for you. Generic medications are usually your lowest-cost option.

What if I am taking a specialty medication?

Specialty medications are for rare or complex medical conditions. They are oral or injectable medications that can cost more than \$600 for a 30-day supply or that require special training or clinical monitoring. Please note, not all specialty medications are listed in this PDL. Most specialty medications require prior authorization for coverage and all are limited to up to a 30-day supply through WHA's exclusive specialty pharmacy network.

Optum® Specialty Pharmacy can provide most of your specialty medications along with helpful programs and services.

Call Optum Specialty Pharmacy at **1-855-427-4682** and have your prescriptions delivered right to your home. You may also contact NorthBay Health, UC Davis onsite pharmacies, or St. Joseph's McAuley pharmacy of Dignity Health. Please refer to your 2025 FEHB BENEFITS BROCHURE (#RI 73-936) for specific copayment amounts.

What are my pharmacy options for filling a prescription?

WHA uses the Optum Rx pharmacy network, which allows you to fill your prescription at any of the participating retail pharmacies. This includes most U.S. chain pharmacies and many independent pharmacies. To find a participating pharmacy near you, visit mywha.org and select pharmacy, or call WHA at the number on your member ID card or listed on the front cover of this booklet.

Can I use a mail order pharmacy?

For medications you take regularly, such as for a chronic or long-term medical condition, you may be able to save time and money by receiving a 100-day supply through Optum® Home Delivery or a 90-day supply by using a network retail pharmacy.

Definitions

Brand-name drug is a drug that is marketed under a proprietary, trademark protected name. The brand name drug shall be listed in all CAPITAL letters.

Coinsurance is a percentage of the cost of a covered health care benefit that an enrollee pays after the enrollee has paid the deductible, if a deductible applies to the health care benefit, such as the prescription drug benefit.

Copayment is a fixed dollar amount that an enrollee pays for a covered health care benefit after the enrollee has paid the deductible, if a deductible applies to the health care benefit, such as the prescription drug benefit.

Deductible is the amount an enrollee pays for covered health care benefits before the enrollee's health plan begins payment for all or part of the cost of the health care benefit under the terms of the policy.

Drug tier is a group of prescription drugs that corresponds to a specified cost sharing tier in the health plan's prescription drug coverage. The tier in which a prescription drug is placed determines the enrollee's portion of the cost for the drug.

Enrollee is a person enrolled in a health plan who is entitled to receive services from the plan. All references to enrollees in this formulary template shall also include subscribers as defined in this section below.

Exception request is a request for coverage of a prescription drug. If an enrollee, his or her designee, or prescribing health care provider submits an exception request for coverage of a prescription drug, the health plan must cover the prescription drug when the drug is determined to be medically necessary to treat the enrollee's condition.

Exigent circumstances are when an enrollee is suffering from a health condition that may seriously jeopardize the enrollee's life, health, or ability to regain maximum function, or when an enrollee is undergoing a current course of treatment using a nonformulary drug.

Formulary is the complete list of drugs preferred for use and eligible for coverage under a health plan product, and includes all drugs covered under the outpatient prescription drug benefit of the health plan product. Formulary is also known as a prescription drug list.

Over-the-counter medications (OTC)

An over-the-counter (OTC) medication may be the right treatment for some conditions. Talk to your doctor about OTC options. Even though OTC medications may not be covered by your pharmacy benefit, they may cost less than a prescription medication.

Generic drug is the same drug as its brand name equivalent in dosage, safety, strength, how it is taken, quality, performance, and intended use. A generic drug is listed in ***bold and italicized lowercase*** letters.

Nonformulary drug is a prescription drug that is not listed on the health plan's formulary.

Out-of-pocket cost are copayments, coinsurance, and the applicable deductible, plus all costs for health care services that are not covered by the health plan.

Prescribing provider is a health care provider authorized to write a prescription to treat a medical condition for a health plan enrollee.

Prescription is an oral, written, or electronic order by a prescribing provider for a specific enrollee that contains the name of the prescription drug, the quantity of the prescribed drug, the date of issue, the name and contact information of the prescribing provider, the signature of the prescribing provider if the prescription is in writing, and if requested by the enrollee, the medical condition or purpose for which the drug is being prescribed.

Prescription drug is a drug that is prescribed by the enrollee's prescribing provider and requires a prescription under applicable law.

Prior authorization is a health plan's requirement that the enrollee or the enrollee's prescribing provider obtain the health plan's authorization for a prescription drug before the health plan will cover the drug. The health plan shall grant a prior authorization when it is medically necessary for the enrollee to obtain the drug.

Step therapy is a process specifying the sequence in which different prescription drugs for a given medical condition and medically appropriate for a particular patient are prescribed. The health plan may require the enrollee to try one or more drugs to treat the enrollee's medical condition before the health plan will cover a particular drug for the condition pursuant to a step therapy request. If the enrollee's prescribing provider submits a request for step therapy exception, the health plans shall make exceptions to step therapy when the criteria is met.

Subscriber means the person who is responsible for payment to a plan or whose employment or other status, except for family dependency, is the basis for eligibility for membership in the plan.

Reading your formulary

The formulary gives you choices so you and your doctor can decide your best course of treatment. In this PDL, a drug is listed alphabetically by its brand or generic name in the therapeutic category and class to which it belongs. Brand-name medications are shown in UPPERCASE (for example, CLOBEX). Generic medications are shown in lowercase (for example, clobetasol).

The generic drug name for a brand name drug is included after the brand name in parenthesis and all bold and italicized letters. If a generic equal for a brand name is both available and covered, the generic drug will be listed separately from the brand name in all bold and italicized lowercase letters.

If a generic drug is marketed under a proprietary, trademark-protected brand name, the brand name will be listed after the generic name in parentheses and regular typeface in all CAPITAL letters.

Brand drug example:

SOVALDI TABS 200 MG (<i>sofosbuvir</i>)	4	PA; SP; QL (30 day supply per 1 fill)
---	---	---------------------------------------

Generic drug example:

<i>lisinopril oral tablet 10 mg, 2.5 mg, 20 mg, 30 mg, 40 mg, 5mg</i>	1	
---	---	--

Generic drug marketed under a proprietary brand name example:

[Ethinodiol Diacet & Eth Estrad] ZOVIA 1/35E (28) TABS 1-35 MG-MCG	1	PV
---	---	----

Tier information

Using lower tier or preferred medications can help you lower your out-of-pocket cost. Review your 2025 FEHB BENEFITS BROCHURE (#RI 73-936) for specific information about your plan. Please note:

- If the pharmacy's retail price for a prescription drug is less than your applicable copayment or coinsurance amount, you will not be required to pay more than the retail price.

Drug tier	Includes	Helpful tips
Tier 1	Preferred generic and certain preferred brand-name medication	Use tier 1 drugs for the lowest out-of-pocket costs.
Tier 2	Preferred brand name and certain non-preferred generic medication	Use tier 2 drugs instead of tier 3 to help reduce your out-of-pocket costs.
Tier 3	Non-preferred (generic or brand) medication	Many tier 3 drugs have lower-cost options in tier 1 or 2. Ask your doctor if they could work for you.
Tier 4	Specialty medication, drugs that require special training or clinical monitoring, and drugs that cost more than \$600 per month	Generally highest in copayment and cost. These drugs are sometimes used for complex and chronic conditions and may require special monitoring and handling.
OA	Office administered medication	May be considered under the medical benefit of the enrollee's contract. Contact your doctor for more information and refer to your 2025 FEHB BENEFITS BROCHURE (#RI 73-936) for coverage information and exceptions.

Drug list information

In this drug list, some medications are noted with letters next to them to help you see which ones may have coverage requirements or limits. Your benefit plan decides how these medications may be covered.

AL	Age limit – These medications may require prior authorization if your age does not fall within the drug manufacturer, Food and Drug Administration (FDA) or treatment guideline recommendations.
AC	Anti-cancer – These oral anti-cancer drugs are subject to a maximum cost sharing for up to each 30-day supply (per California State Law).
M	Authorized generic or cobranded product
PA	Prior authorization – Your doctor is required to give WHA more information to determine coverage.
PV	Preventive drugs – May have coverage and no copayment when health care reform requirements are met.
PV*	Preventive drugs – Available at \$0 if Health Care Reform copay waiver is approved.
QL	Quantity limit – Restriction on the number of doses or any other limitations on the quantity of a prescription drug a health plan will cover during a specific time period.
SP	Specialty medication – Medication is designated as specialty.
ST	Step therapy – Must try lower-cost medication(s) before a higher-cost medication can be covered
3P	Tier 3 preferred
^	Copayments waived for this medication; skip deductible.

How do I request a prior authorization or step therapy exception?

If your medication requires prior authorization (PA) or a step therapy exception, your doctor can fax a completed PA form (available at westernhealth.com/provider) to Western Health Advantage at **1-916-563-5280** or submit an Electronic Prior Authorization (ePA). Should you or your doctor need additional information on how to request PA, please call the number on your member ID card. Once your doctor's request is received, we will notify your doctor of our decision within 72 hours. If WHA fails to respond to a completed PA or step therapy exception request within 72 hours of receiving a non-urgent request and 24 hours of receiving a request based on exigent circumstances, the request is deemed approved, and the health insurer may not deny the request thereafter.

If your doctor believes that waiting 72 hours for a standard decision could be harmful to your health, your doctor can ask for a fast decision. This applies only to requests for medications that you have not already received. We must make expedited decisions within 24 hours after we get your doctor's supporting statement.

In some cases, our plan requires you to first try certain medications to treat your medical condition before we will cover another drug for that condition. This is called step therapy. The required first step medication or preferred drug is a proven, cost-effective medication. Unless an exception is made, one or more preferred medications must be tried before progressing to a drug that is subject to step therapy.

A request for an exception to a step therapy requirement may be submitted by your doctor in the same manner as a request for PA. If a request for step therapy exception is denied, you or your doctor may appeal the denial. The denial documents provide more information on the appeal rights and procedures. If you have already tried and failed the preferred drug(s), or if you are already taking a drug that is subject to step therapy upon enrollment in your WHA plan, step therapy won't be required. Also, the medication will be approved for coverage when guidelines are met for being medically necessary.

If we approve your medication PA or step exception, the approval continues for the date range noted on the exception, which may be for a specified number of prescription fills and for a period up to a maximum of 1 year. To keep the exception in place, you must remain enrolled in our plan, your doctor must continue to prescribe your medication at the same dosage and frequency of use, and your drug must be safe and effective for treating your condition.

Some covered drugs may have additional requirements or limits on coverage, such as quantity limits (QL). A QL sets the amount of drug that you can receive. A prior authorization request for medical necessity may be required to exceed these limits.

Are Flu and other vaccines covered?

Routine vaccines recommended by the Advisory Committee on Immunization Practices (ACIP) are covered at \$0 cost share when administered at a network pharmacy. Some restrictions or limitations apply. The flu and COVID-19 vaccines are available at \$0 cost share for members 3 years of age and older. Many other routine vaccines are available at \$0 cost share for members 9 years of age and older. When administered in a doctor's office, vaccines are covered under the medical benefit.

Please refer to your 2025 FEHB BENEFITS BROCHURE (#RI 73-936) for coverage information specifics and exceptions on vaccines administered in your doctor's office.

Are all contraceptives covered?

Contraceptive benefits include coverage for all FDA-approved prescription and OTC contraceptive methods at \$0 cost-share. If a therapeutic equivalent of a particular brand name drug or device exists, members must use the generic product to be eligible for \$0 cost share. Contraceptive devices (including IUDs) and implantable contraceptives are not covered under the pharmacy benefit. They are covered under the medical benefit as described in your 2025 FEHB BENEFITS BROCHURE (#RI 73-936). Refer to your 2025 FEHB BENEFITS BROCHURE (#RI 73-936) for coverage information and limitations.

What blood glucose supplies are covered?

Specific brands of blood glucose testing strips, lancets, and insulin syringes are covered by your pharmacy plan. You will need a prescription to use the pharmacy benefit for covered items. Prescriptive medications for the treatment of diabetes, including insulin and glucagon, are also covered under your pharmacy benefit.

Other diabetes supplies, equipment, and services may be covered under your medical benefit.

These include:

- blood glucose monitors
- insulin pumps and supplies
- ketone urine testing strips
- insulin pen delivery systems

Please refer to your 2025 FEHB BENEFITS BROCHURE (#RI 73-936) for coverage information specifics and exceptions.

Are HIV medications covered?

All HIV medications are covered under your pharmacy benefit if filled at a retail or specialty pharmacy. If administered by a health care professional, medications are covered under the medical benefit.

For combination antiretroviral drug treatments that are medically necessary for the treatment of AIDS/HIV, WHA will cover a single-tablet drug regimen that is as effective as a multitablet regimen unless, consistent with clinical guidelines and peer-reviewed scientific and medical literature, the multitablet regimen is clinically equally or more effective and more likely to result in adherence to a drug regimen.

WHA covers antiretroviral drugs that are medically necessary for the prevention of HIV at \$0 cost share if delivered by a network health care provider and filled through a network pharmacy. These items include pre- or postexposure prophylaxis (PrEP or PEP). If there is a therapeutic equivalent of a brand-name drug, only the generic product will be eligible for \$0 cost share.

Are COVID-19 products covered?

WHA members are covered for COVID-19 vaccines and prescription therapeutics at \$0 cost-share when obtained at a network pharmacy or at their primary care provider (PCP). WHA will reimburse the cost of up to eight (8) FDA-approved at-home COVID-19 test kits per month at a maximum reimbursement of \$12 per kit (including tax and shipping if applicable) when obtained at a network pharmacy as required by state law. Standard cost shares apply when filled at a pharmacy outside of the Optum Rx standard network. Claim reimbursement can be submitted through WHA pharmacy partner Optum Rx at <https://www2.optumrx.com/forms.html>. All receipts dated on or after January 15, 2022 will be accepted. A printed claims form may also be submitted. WHA will also cover the cost of general COVID-19 testing. If you believe you have been exposed and want to get tested, contact your doctor.

The company does not discriminate on the basis of race, color, national origin, sex, age, or disability in health programs and activities.

Free services are provided to help you communicate with us, such as letters in other languages or large print. You may also ask to speak with an interpreter. To ask for help, please call the toll-free phone number listed on your ID card.

ATENCIÓN: Si habla español (Spanish), La compañía no discrimina por raza, color, nacionalidad, sexo, edad o discapacidad en actividades y programas de salud.

Se brindan servicios gratuitos para ayudarle a comunicarse con nosotros, como cartas en otros idiomas o en letra grande. También puede solicitar comunicarse con un intérprete. Para solicitar ayuda, llame al número de teléfono gratuito que figura en su tarjeta de identificación.

請注意：如果您說中文 (Chinese)，公司不会基于种族、肤色、国籍、性别、年龄或残疾而在健康计划和活动中歧视任何人。

为帮助您与我们沟通，我们提供一些免费服务，例如用其他语言书写的信件或大字体。您也可以要求与口译员对话。欲寻求帮助，请拨打您的 ID 卡上列出的免费电话号码。
